

PLAY

One way of how to use Coventry Museum's Play Trail:

Wander about.

Open the pack at random.

Start playing.

Share the love the traditional way or on Social Media using
#SummerofPlay #FunFriendsFreedom

Colour finder

Find all the colours of the rainbow.

Follow the lines.

Walk or balance along a line on the ground.

Where will your path lead you?

Play charades.

**Pretend to be something or someone
and let your group guess what or who you are.**

How many...

.... giant steps does it take to get
to your favourite object from where you stand?

Silly faces all around.

**Pull silly faces at each other.
See who laughs first.**

Level up: Find a reflective surface (a mirror or a shiny metal object)
and see for yourself how silly your face pulling can get.

Shadow theatre.

Light and dark make for the best shadow theatres.

Use your hands to make up different characters
and tell a wonderfully magical story.

Dance Party.

We are always surrounded by lots of sounds.
Listen carefully and get dancing to the beat of life.

No sounds? Make up your own and have fun anyway.

Dream up a museum.

What would you put in it? Tell someone.

Level up: Make your own museum starting with a card-board box, some colours and your own collection of bits and bobs.

Guess what

Pick something you see. Let your group guess what it is. The catch? They are only allowed to ask yes/no questions.

How many questions will they have to ask before they can guess your object?

Way to move

Tippytoe, hop, skip, or crabwalk your way from one place to another.

I dare you ...

... to ask one of our Museum Staff a question.
... to learn three facts to tell one of our Museum Staff.

Play I-Spy

Make up your own I-Spy game.
Spy colours, numbers from 1-99, or the ABC.

Building challenge

Using whatever you have on you (or in your grown-ups bag) to build the tallest possible tower.

Beatbox to your journey

Beatboxing: mimicking drums and other musical instruments using your mouth, lips, tongue, and voice.

Which sounds would the things you see make?
Can you make those sounds just like a beatboxer?

Your turn

Come up with your own game and play away.

PLAY

measure it up.

Find out how long or how tall something is by finding ways to measure. Taking steps, lining up yourselves or something alongside, setting one block on top of another are all possible ways. Come up with other ways to measure.

Robot

You will need to have a robot and one robot instructor. The instructor is in charge of the robot and needs to guide the robot by giving the robot exact instructions. Make sure you are not bumping into someone or something.
